PROFILE

I started my undergraduate business degree excited about learning how business decisions can impact an uncertain world. What inspired me the most were the courses requiring mathematical reasoning and quantitative analysis, pointing me to explore Econometrics and Operations Research as a path to understand, model and solve problems in dynamic and uncertain environments.

EDUCATION

Universidad Argentina de la Empresa

Buenos Aires 2025

Double Bachelor in Business Administration and International Trade

Coursework: Business Mathematics (functions, vectors, matrices, determinants, systems of linear equations), Business Statistics (descriptive statistics, probability theory, combinatorics, discrete and continuous distributions, Central Limit Theorem). GPA 7.55/10

Instituto Pestalozzi

Buenos Aires 2020/24

High School Diploma with Language Specialization · Deutsche Auslandsschulnetz

Coursework: Calculus (limits, continuity, derivatives, integrals, area calculation, optimization), Functions (linear, quadratic, rational, exponential, logarithmic, trigonometric, inverse and composite), Sequences (arithmetic and geometric), Matrices and Determinants, Systems of Equations, Analytic geometry (coordinate system, equations of lines and circles, distance between points, midpoint), Probability and Statistics (normal and binomial distributions, Pearson correlation, standardization). GPA 7.33/10

Memberships: Robotics and Programming Club, Leadership Workshop, Exchange Programme Gesamtschule Münster Mitte (Germany)

Additional Coursework: Quantitative Modeling (UPenn) · Inferential statistical analysis with Python (University of Michigan, ongoing) · Econometrics: Methods and Applications (EUR, ongoing)

ANALYTICAL PROJECTS: INDEPENDENT RESEARCH

Did Crowd Absence Reduce Home Advantage? - Premier League (2000–2025)

2025

Used regression and statistical tests on 9,380 matches to estimate the impact of crowd absence during COVID-19, finding a partial decline in home advantage.

Does the Transfer Market Reward Performance or Potential? - La Liga (2014–2024)

2025/26

Scraped and merged 2,679 player-seasons from understat.com and Transfermarkt to model market value with OLS regression, finding the market rewards potential over current performance, with value peaking at 19-20.

EXPERIENCE

Fundación Sayani *Data Management Volunteer under the supervision of Elena Anachuri*

Jujuy 2025

Migrated manual patient records to structured spreadsheets, implemented data validation, and developed data visualizations for fundraising presentations to local and international donors.

Enduro Park Argentina *Operations Intern under the supervision of Maria Casares*

San Pedro 2025

Supported the operations team in planning and executing large-scale motorsport events, managing participant registration data and assisting with scheduling and resource allocation across multiple event areas.

RUDA *Co-Founder*

Buenos Aires 2024

Co-founded a student organization promoting healthy lifestyle awareness; managed budgeting, cost estimation, and break-even analysis for self-funded operations.

Volunteer *Math Tutor*

Parroquia San Benito Abad 2024

Tutored primary and secondary school students with learning difficulties in mathematics, adapting methods to individual needs.

Volunteer *Rural Education Support - PAS*

Neuquén 2024

Participated in student-led community service initiative; organized fundraising events and contributed to rural school renovation project.

SKILLS AND LANGUAGES

Languages: Spanish (Native), English (CAE Cambridge), German (DSD II), Portuguese (Basic)

Programming: Python (Pandas, NumPy, Matplotlib, Statsmodels, requests), Excel/Google Sheets
